What does ECHAlliance Group do?

CONNECT

Use the power of our global network to make the connections you need.

CONVENE

Use our ability as a neutral party to bring together and reach the right audience.

AMPLIFY

Harness the capacity of our global network to amplify your message.

ACCELERATE

Engage across our network to speed up adoption and awareness.

What is an ECHAlliance Ecosystem

...bring together a permanent community of stakeholders to develop a joint health agenda, aiming to address and find common solutions to regional health challenges

Match Need and Solution

The main benefit of working together in an Ecosystem is the multiplier effect of collaborating in our International Network of Ecosystems.

Ecosystems:

- break down silos,
- transform healthcare delivery,
- create economic growth

Technology promises to
healthcare are not new

Digital health “boom”

2012: EU eHealth Action Plan

2018: Commission’s Communication on the Transformation of Digital Health and Care

2020: Europe fit for digital age

2022: Regional digital health action plan for the WHO European Region 2023–2030

The Regional digital health action plan 2023–2030

Priorities:

- Set norms
- Enhance capacity
- Build networks
- Scale up patient centred solutions

European health challenges

- ⊗ Ageing population and chronic diseases putting pressure on health budgets
- ⊗ Unequal quality and access to healthcare services
- ⊗ Shortage of health professionals

Potential of digital applications and data to improve health

- ✍ Efficient and integrated healthcare systems
- ✍ Personalised health research, diagnosis and treatment
- ✍ Prevention and citizen-centred health services

What EU citizens expect...

- 90% agree** To access their own health data (requiring interoperable and quality health data)
- 80% agree** To share their health data (if privacy and security are ensured)
- 80% agree** To provide feedback on quality of treatments

Support European Commission:

1 Secure access and exchange of health data

Ambition:
Citizens securely access their health data and health providers (doctors, pharmacies...) can exchange them across the EU.

Actions:

- eHealth Digital Service Infrastructure will deliver initial cross-border services (patient summaries and ePrescriptions) and cooperation between participating countries will be strengthened.
- Proposals to extend scope of eHealth cross-border services to additional cases, e.g. full electronic health records.
- Recommended exchange format for interoperability of existing electronic health records in Europe.

2 Health data pooled for research and personalised medicine

Ambition:
Shared health resources (data, infrastructure, expertise...) allowing targeted and faster research, diagnosis and treatment.

Actions:

- Voluntary collaboration mechanisms for health research and clinical practice (starting with "one million genomes by 2022" target).
- Specifications for secure access and exchange of health data.
- Pilot actions on rare diseases, infectious diseases and impact data.

3 Digital tools and data for citizen empowerment and person-centred healthcare

Ambition:
Citizens can monitor their health, adapt their lifestyle and interact with their doctors and carers (receiving and providing feedback).

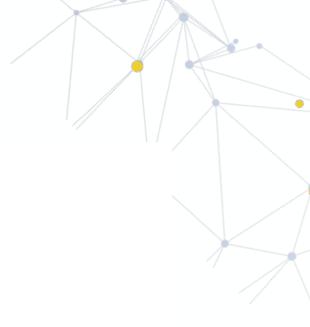

Actions:

- Facilitate supply of innovative digital-based solutions for health, also by SMEs, with common principles and certification.
- Support demand uptake of innovative digital-based solutions for health, notably by healthcare authorities and providers, with exchange of practices and technical assistance.
- Mobilise more efficiently public funding for innovative digital-based solutions for health, including EU funding.

EU Digital Compass points 2030

Skills

ICT Specialists: 20 million + Gender convergence

Basic Digital Skills: min 80% of population

Public Services

Key Public Services: 100% online

e-Health: 100% availability medical records

Digital Identity: 80% citizens using digital ID

Infrastructures

Connectivity: Gigabit for everyone, 5G everywhere

Cutting edge Semiconductors: double

EU share in global production

Data – Edge & Cloud: 10,000 climate

neutral highly secure edge nodes

Computing: first computer with quantum acceleration

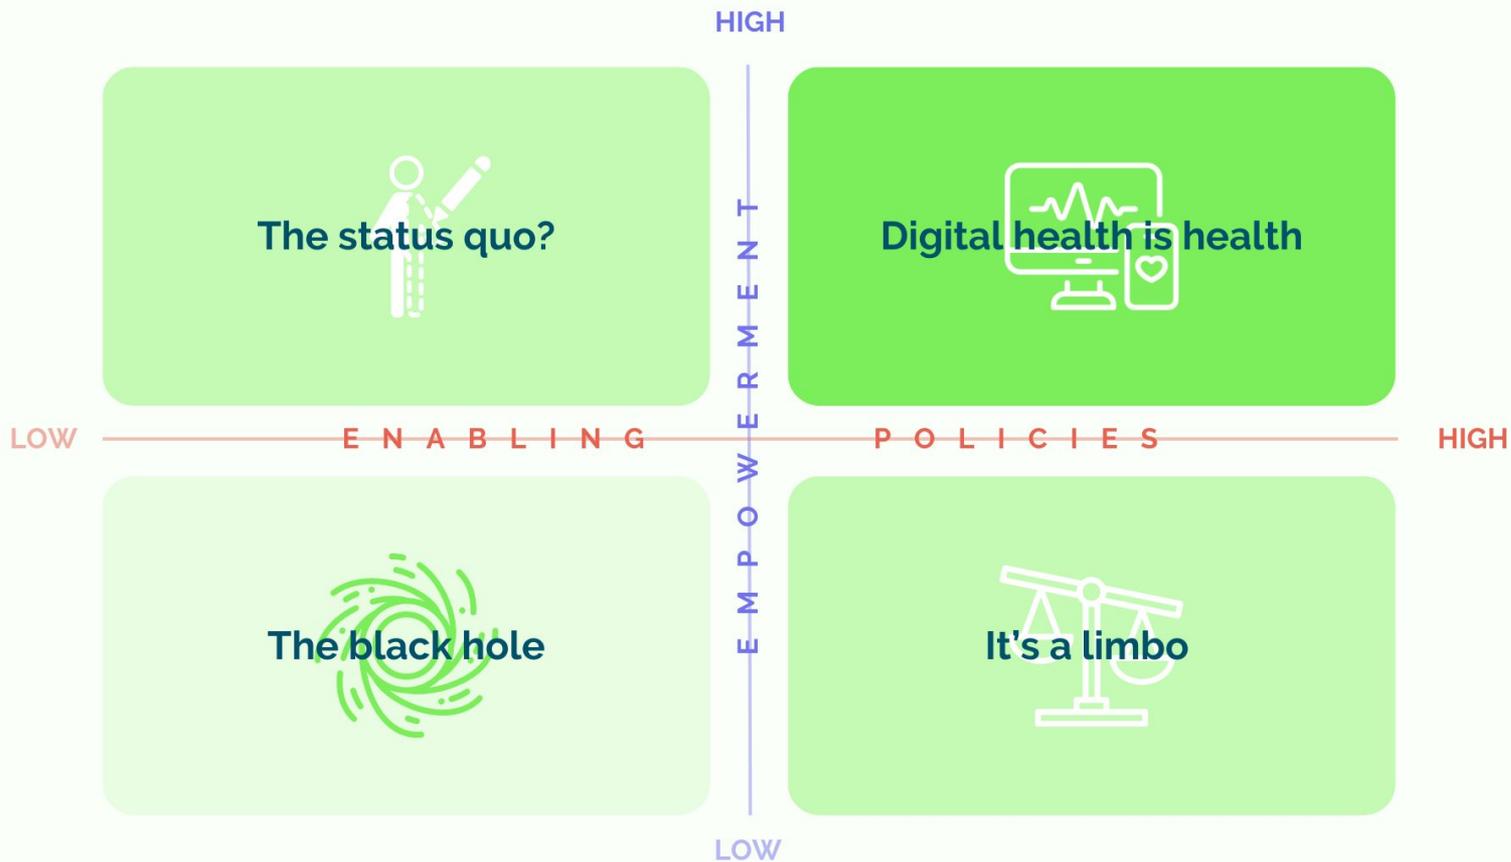

Business

Tech up-take: 75% of EU companies using Cloud/AI/Big Data

Innovators: grow scale ups & finance to double EU Unicorns

Late adopters: more than 90% of European SMEs reach
at least a basic level of digital intensity

Four priority areas – or Digital Compass points - essential for Europe's digital transition by 2030 (Path to the Digital Decade, 2021)

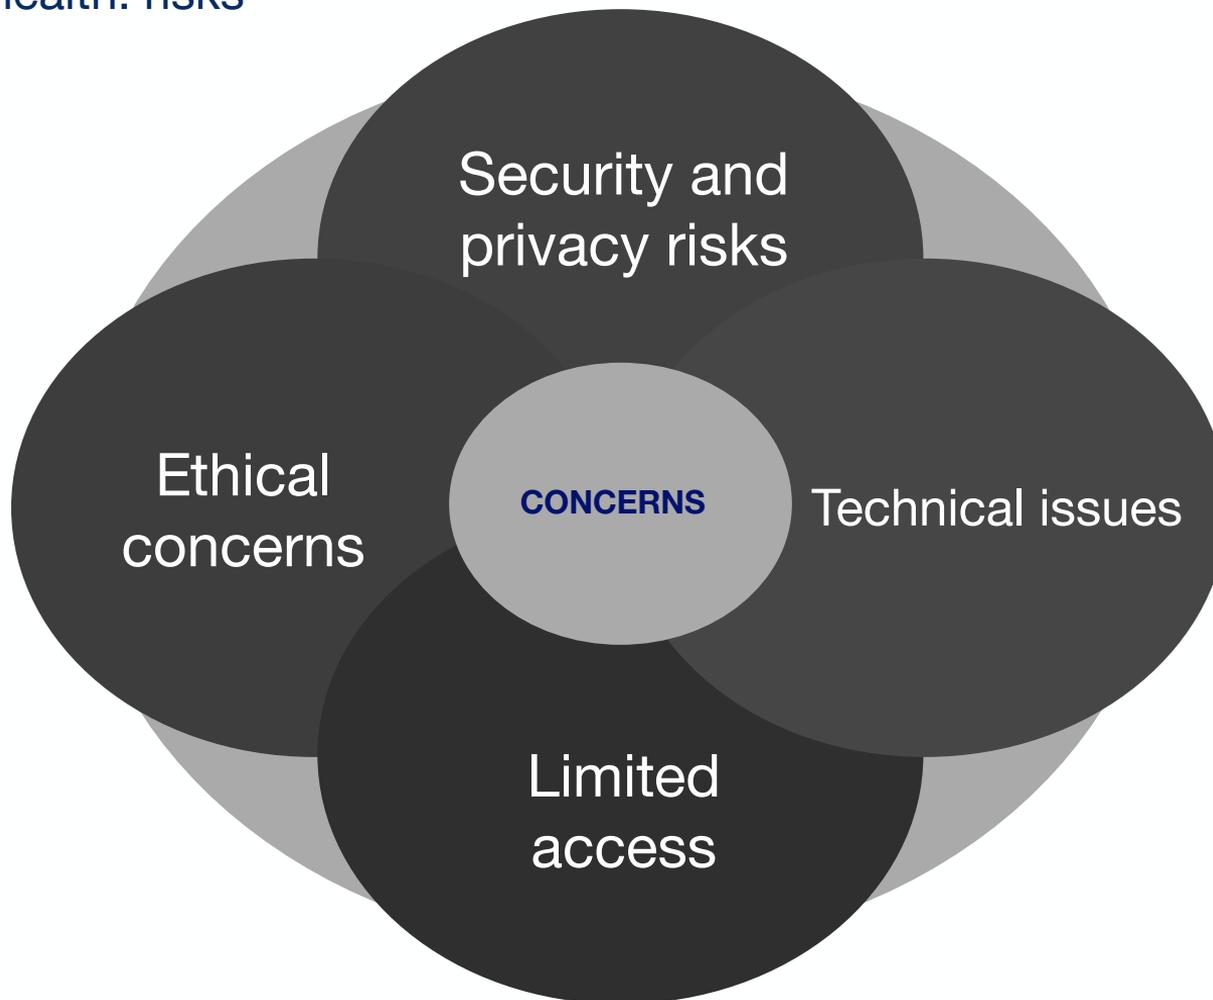

Digital health: opportunities

Digital health: risks
